EXPERIENCE

PROFESSIONAL

FULL-STACK WEB DEVELOPER

Ascentus 04/2016 - PRESENT

Develops all server-side logic and client-side logic, maintains central database, ensures high performance and responsiveness of code to requests from the front-end. Also responsible for building and managing a map-based directory, improving server load times, implementing data protection, and optimizing back-end/front-end code for SEO.

WEB DEVELOPER

Findsome & Winmore 03/2015 - 04/2016

Designed, developed, and deployed client websites, and provided consulting for clients. Tools utilized include Magento, Wordpress, AngularJs, Nginx, Sketch, Photoshop, and Illustrator.

TECHRANGER WEB DEVELOPER

University of Central Florida 09/2013 - 03/2015

Developed and designed a custom PHP powered HTML accessibility evaluator for use by UCF faculty.

Used AngularJs, SCSS, and Gulp to develop and maintain interactive HTML 5 widgets/games for UCF's online education platform.

Developed and designed office website used by the Center for Distributed Learning.

PERSONAL

KNIGHT HACKS

09/2015 - 05/2016

Knight Hacks is both a student organization and upcoming hackathon at the University of Central Florida.

I developed websites for both the hackathon and club using a custom Node.js and Gulp powered static-site generator that I created and subsequently open-sourced on Github. I also designed all Knight Hacks branding and was on the planning committee for the first hackathon.

BAZAAR.TF

06/2012 - PRESENT

Bazaar.tf is a 450k+ user strong online trading community I co-founded that was built for gamers on Valve's Steam platform.

Primary duties were community management, design, and full-stack development utilizing JQuery, Node.js, LESS, CakePHP, Python, MySQL, and Nginx

EDUCATION

2013

B.S. COMPUTER SCIENCE - University of Central Florida

2011 - 2013

A.A. GENERAL STUDIES - Valencia College
